ProLnk Integration List (Categorized)

NEED

AI Models

Tool	Purpose
Claude (Anthropic)	Primary reasoning — strategy, code, conversation, chatbot backbone, dispute mediation
GPT-4o / GPT-5 (OpenAI)	Waterfall photo analysis — material identification, damage detection, trade-specific issues
Gemini 1.5/2.0 Pro (Google)	Video walkthrough analysis, 1M+ token context for full property histories
Llama 3/4 (Meta)	Self-hosted inference — routine photo classification at zero per-token cost, privacy-sensitive tasks
DALL-E 3 / Flux	AI room renderings — photorealistic renovation mockups from homeowner photos
ElevenLabs	AI voice — automated phone calls, IVR, conversational agents
Whisper (OpenAI)	Speech-to-text — voice messages, call transcription, smart glasses audio
OpenAI Embeddings	Vector search — semantic search across knowledge base, property data, job histories

AI Orchestration & Memory

Tool	Purpose
LangGraph	Multi-agent orchestration — powers the internal ProLnk OS orchestrator (your "Paperclip")

n8n	Event-driven workflow automation — separate instance per business entity for clean sale
Zep	Long-term memory — agents remember every partner interaction across sessions

Autonomous AI Monitoring

Tool	Purpose
AI Model Tracker Agent	Monitors new model releases, flags when something outperforms your current stack
Tool & Integration Monitor	Watches GitHub releases and API changelogs for breaking changes before they hit you
Competitor Intelligence Agent	Monitors competitor launches, funding, features — weekly digest
Benchmark Comparison Engine	Auto-tests new models against your photo/rendering pipeline — "should we switch?"
News & Regulation Scanner	Tracks NOAA policy, MLS standard updates, privacy law changes, licensing regulation
Self-Improvement Loop	Analyzes your own system performance — cost, speed, failures — recommends optimizations

Hosting & Deployment

Tool	Purpose
Vercel	Frontend deployment — React apps, edge functions, instant rollbacks
Railway	Backend services — API servers, workers, cron jobs, databases. Usage-based.
Cloudflare	CDN, DDoS protection, DNS, WAF, bot management over everything

AWS (S3, Lambda, MediaConvert, SES)	Heavy compute, file storage, video processing, transactional email

Knowledge Management

Tool	Purpose
Obsidian	Your second brain — linked knowledge graph. Claude reads/writes via MCP. AI Monitor writes daily.
Obsidian MCP Server	Allows Claude to read/write/search your vault directly
Notion	Company wiki — SOPs, product specs, onboarding docs for future team

Chatbots

Tool	Purpose
Homeowner Rendering Chatbot	Receives room photos, asks questions, feeds context to AI renderer so output matches their room
Pro Support Chatbot	24/7 support for pros — scheduling, payments, platform help, commissions
Dispute Resolution Chatbot	Mediates disputes — reviews photos, timeline, contract, proposes resolution

Smart Glasses & Video Pipeline

Tool	Purpose
Smart Glasses Hardware (Ray-Ban Meta / Vuzix)	Wearable camera — records entire job for comprehensive home profiles
Video Streaming / Upload Pipeline	Post-job upload to cloud (30min–2hr per job)

AWS MediaConvert / Mux	Video processing — transcoding, thumbnails, segment extraction

Mobile App

Tool	Purpose
React Native / Expo	Cross-platform mobile app — iOS + Android from single codebase
Standalone Pro App	Lightweight job management + photo capture for non-ServiceTitan pros
Firebase Cloud Messaging	Push notifications — real-time job alerts, referrals, payouts

Scheduling & Calendar

Tool	Purpose
Built-in Scheduling Engine	Pro availability, job booking, time slots, recurring services
Google Calendar API	Two-way sync with pro's personal calendar
iCal Feed	Apple Calendar subscribers
Route Optimization (Google Directions)	Optimal job order by location + time + traffic

Property & Geospatial Intelligence

Tool	Purpose
Google Maps	Geocoding, directions, places, route optimization
Mapbox	Custom visualization — territory heat maps, serviceable area boundaries in admin portal

Nearmap / EagleView	Aerial imagery — roof analysis, post-storm damage at neighborhood scale
NOAA / NWS API	Severe storm alerts, radar. FREE. Triggers proactive outreach before homeowners know.
MLS / RESO Web API	Property transactions, listings. Home sells = new customer trigger.
Zillow Group API	Zestimates, property records, tax data. Feeds Home Health Vault.
ServiceTitan API	Integration with dominant home services platform — photo acquisition, job sync

Payments & Payouts

Tool	Purpose
Stripe	Primary processor — subscriptions, job payments
Stripe Connect	Multi-party payouts to 22,000+ pros, 1099 reporting, bank management per pro

Communications

Tool	Purpose
Twilio	SMS — reminders, confirmations, alerts, 2FA
SendGrid / Resend	Transactional + marketing email
Superhuman	Your personal AI email
Granola	AI meeting notes without a bot joining your calls
Slack	Team comms, automated notifications from all systems

Human Resources

Tool	Purpose
Claude HR Agent	Job descriptions, screening, offers, onboarding, performance reviews
DocuSign	Electronic signatures for all partner agreements
Checkr	Background checks for every pro
Contractor Licensing APIs	License + insurance verification at signup and ongoing

Reviews & Reputation

Tool	Purpose
Proprietary Review System	Homeowners rate pros — powers ranking + matching algorithm
Google Reviews API	Pull existing reviews + push satisfied customers to leave new ones

OCR & Document Processing

Tool	Purpose
AWS Textract / Google Document AI	Auto-extract data from licenses, insurance certs, invoices

Permit & Compliance

Tool	Purpose
Municipal Permit APIs	Check permit requirements by jurisdiction before work starts
State Licensing Databases (TDLR)	Real-time license verification

Insurance Verification (ACORD/Verisk)	Active GL + workers comp verification

Supply Chain

Tool	Purpose
Material Cost Estimation (AI)	Part of rendering pipeline — estimates costs alongside mockup

Training & LMS

Tool	Purpose
Built-in LMS	Onboarding, tutorials, compliance, photo best practices
Mux / Vimeo OTT	Training video hosting with analytics + gating
Certification System	Badges — "Photo Certified", "Smart Glasses Certified", "5-Star Pro"
AI-Generated Training (Claude + ElevenLabs)	Auto-generates new training modules when features change

Sales & Growth

Tool	Purpose
Apollo.io	B2B prospecting — licensed contractors by trade + location
Affinity CRM	Relationship intelligence for Charter Partner pipeline
Bitly	Referral link tracking + analytics

Marketing

Tool	Purpose
Canva	Design — printed materials, social, QR cards, brand kit

Legal

Tool	Purpose
Claude Legal Agent	Drafts agreements, patent risk analysis, compliance review

Engineering

Tool	Purpose
GitHub	Code repo, version control, multi-agent collaboration, deploy triggers
Claude Code	Primary AI coding agent
Sentry	Error monitoring, crash reporting
PostHog	Product analytics, session replay, feature flags, experiments
Context7	MCP server for up-to-date documentation
Apify	Web scraping — powers AI Monitor (competitor pages, model trackers, regulation sites)

WANT

AI Models

Tool	Purpose

Hugging Face (custom fine-tuned)	Cheaper inference for high-volume repetitive tasks (trade classification, damage scoring)

AI Orchestration

Tool	Purpose
Mem0	Complementary episodic memory — semantic search over past decisions
LangSmith	LLM observability — traces every AI call, identifies failures, measures quality

Hosting

Tool	Purpose
RunPod	GPU hosting for self-hosted Llama when volume justifies dedicated GPU

Scheduling

Tool	Purpose
Cal.com	Self-booking for homeowners (open-source, embeddable)

Property & Geospatial

Tool	Purpose
ATTOM Data	Deep property intelligence beyond Zillow
FEMA Flood Maps	Flood zone risk data for property profiles
Tomorrow.io	Hyperlocal weather for scheduling optimization

Cape Analytics	AI property intelligence from aerial imagery

Home Services Ecosystem

Tool	Purpose
Housecall Pro API	Second-largest platform integration
Jobber API	Smaller contractor platform
Home Warranty APIs	Inbound dispatch on warranty claims
Insurance Claims APIs	Storm damage claim → pro dispatch

Payments

Tool	Purpose
Square	Failover processor if Stripe goes down
Adyen	Enterprise-grade backup processor
QuickBooks API	Automated bookkeeping
Pigment	AI financial planning and forecasting
Coupler.io	Data integration between financial tools

Supply Chain

Tool	Purpose
Home Depot Pro API	Materials ordering tied to job scopes
Ferguson API	Plumbing/HVAC supply ordering

Sales & Growth

Tool	Purpose
Common Room	Community intelligence — track engagement signals
Clay	Data enrichment for prospecting

Marketing

Tool	Purpose
Gamma	AI presentations for investor decks, partner pitches
Jasper AI	Brand voice consistency across all content
Ahrefs	SEO intelligence — keyword tracking, competitor backlinks
Figma	Design system for consistent UI across all products
G2	Review platform + buyer intent signals

Legal

Tool	Purpose
Spellbook	AI contract review and drafting
Lumin PDF	PDF annotation for complex legal documents

Reviews

Tool	Purpose
Yelp Fusion API	Secondary reputation signal

BBB API	Complaint history check during onboarding

Data & Analytics

Tool	Purpose
Hex	BI dashboards for deep analysis
BigData.com	Alternative data sources

Engineering

Tool	Purpose
Desktop Commander	Claude controls your Mac directly
Firecrawl	AI-optimized web crawler

Security & Ops

Tool	Purpose
incident.io	Incident response management at scale
Glean	Enterprise AI search across all knowledge sources

HR

Tool	Purpose
Gusto	Payroll when you eventually hire W-2 employees

Commercial

Tool	Purpose
Moody's CRE	Commercial real estate data for ProLnk Exchange

SKIP

Tool	Why You Don't Need It
Supabase	Already using TiDB + Drizzle + S3 — would be redundant
Zapier	n8n does everything Zapier does, self-hosted, you own the data, no per-zap pricing
Amplitude	PostHog covers all analytics for free up to 1M events
Fireflies	Granola does the same thing without a bot joining your calls
Databricks	Overkill until post-Series A — PostHog + Hex covers your analytics needs
Google Compute Engine	Railway + AWS already covers all compute needs
Base44	You already have a custom-built platform — no need for a no-code builder
